

INSTRUCTIONS

Wildflowers for the Honeybees:

You'll need:

- 2 earth-shaped seed papers (included)
- 1 medium sized container
- Dirt or potting soil

To attract North Carolina's state insect, the honeybee, plant some wildflowers for them to pollinate! Soak your earth seed papers in water overnight. Then, tear them up and plant them under a thin layer of soil. Water them daily until the seeds germinate in 1-3 weeks. Enjoy the bees that come by to see the pretty flowers that you've grown!
