

INSTRUCTIONS

Paper Airplane:

You'll need:

- 1 piece of white paper (included)
- 1 set of instructions (included)

Make your own C-47 Skytrain! Follow the instructions to fold your paper airplane. If you want to color it to look like the C-47, use the example photo on the back of the page. Once you're done, let it fly!

Paratrooper:

You'll need:

- 4 pieces of string (included)
- 1 toy soldier (included)
- 1 large dinner napkin (included)

Open the paper napkin completely, taking care not to crumple it. Twist one napkin corner (about an inch), so that you can tie the end of a piece of yarn around the twist. Repeat step 3 with each corner. Bring the ends of the yarn together and tie them together in a knot, being sure to leave about a 2-inch tail. Tie the ends of the yarn around the arms of the toy soldier to finish off your paratrooper. Toss your paratrooper in the air and watch him glide back down to earth!
